Updated 7 November 2026

Positions

Sep 2026 – present	**UK Field Epidemiology Training Programme fellow** UK Health Security Agency; North West Field Service, Liverpool Applied field epidemiology training, covering surveillance, outbreak response and applied projects.
Aug 2021 – 2025	**Data scientist in genomic epidemiology** Department of Biology (formerly Zoology), University of Oxford Genomic epidemiology of COVID-19 variants and control measures, scalable phylodynamic pipelines, dengue resurgence in Vietnam, and biases in COVID-19 surveillance data with the Global.health consortium.
May – Nov 2020	**Research assistant** Roslin Institute, University of Edinburgh Phylogenetic analysis of the spread of SARS-CoV-2 in Scotland.

Education

Oct 2023 – present	**DPhil in Biology** University of Oxford; Department of Biology and Pandemic Sciences Institute Thesis on integrating multiple data sources and quantitative tools to understand pathogen dynamics, with chapters on dengue and chikungunya transmission and on the GRAPEVNE pipeline environment. Supervised by Moritz Kraemer and Katrina Lythgoe. Funded by the Oxford-NaturalMotion Graduate Scholarship with Jesus College.
Sep 2021 – Aug 2022	**PGCert in Philosophy** University of Cambridge
Oct 2020 – Oct 2021	**MSc Epidemiology, Distinction** Imperial College London; School of Public Health Dissertation on genomic sampling strategies for estimating SARS-CoV-2 epidemiological parameters, supervised by Nuno Faria and Kris Parag and later published in Nature Communications. Gold Prize at the European stage of the EIT Innovation in Health challenge.

Sep 2017 – Jul 2020

BSc (Hons) Infectious Diseases, First Class

University of Edinburgh

Ritchie Prize for the most distinguished student in the year. My dissertation, on the spread and evolution of zoonotic RNA viruses from China, received the highest mark in the cohort.

Publications

Joint first authors are marked *. Full list on Google Scholar (scholar.google.com/citations?user=MG7ctSYAAAAJ).

Grants and awards

2026	**Bowers Fund grants (two awards), £300 each**
2025	**Bowers Fund grant, £300**
2025	**Jesus College Graduate Scholarship** Jesus College, Oxford
2023	**Prize for best speaker** EScamps conference, University of Cambridge
2023	**Oxford-NaturalMotion Graduate Scholarship** University of Oxford, in partnership with Jesus College
2023	**Graduate Choral Scholarship** St Peter's College, Oxford

2020–21	**Gold Prize, EIT Innovation in Health challenge** European Institute of Innovation and Technology. Winner at the local and European stages.
2020–21	**Runner-up, Imperial Healthcare Hackathon** Imperial College London
2020	**Ritchie Prize** University of Edinburgh. For the most distinguished student in the year, with the highest overall mark.
2020	**Highest dissertation mark** BSc Infectious Diseases, University of Edinburgh
2019	**Undergraduate Vacation Scholarship** Medical Research Scotland. Funded a summer research project on host–pathogen interactions.

Talks and posters

2026	**Climate, importation, and immunity shape chikungunya transmission across emerging and endemic settings** Poster, International Pandemic Sciences Conference, Singapore
2026	**PPIE: the patient experience** Guest speaker, NIHR Health and Care Internship Training Day, London
2025	**Championing patient and public involvement in research** Guest speaker, Encephalitis International VIP Changemaker Event, London
2025	**Incorporating patient voice in clinical research** Expert panellist, Evelina London Research Showcase, London
2025	**Global homogenisation of dengue virus diversity following the relaxation of COVID-19 pandemic restrictions** Poster, Ecology and Evolution of Infectious Diseases (EEID), University of Notre Dame, USA
2024	**Patient perspective: from patient to researcher** Invited speaker and expert panellist, British Paediatric Neurology Association Annual Meeting, Birmingham
2024	**Patient perspective: from patient to researcher** Invited speaker, Royal College of Paediatrics and Child Health, London
2023	**Streamlining large-scale analyses: building scalable and flexible pipelines for disease analytics – case study of dengue in Vietnam** Poster, Epidemics Conference, Bologna, Italy
2023	**Reemergence of Cosmopolitan genotype dengue virus serotype 2, southern Vietnam** Contributed talk, EScamps, University of Cambridge. Best speaker prize

2023 **Cryptic transmission and re-emergence of Cosmopolitan genotype of dengue virus serotype 2 within Ho Chi Minh City and southern Vietnam**
Poster, Virus Evolution and Molecular Epidemiology (VEME), Stellenbosch University, South Africa

2023 **Cryptic transmission and re-emergence of Cosmopolitan genotype of dengue virus serotype 2 within Ho Chi Minh City and southern Vietnam**
Poster, Pandemic Sciences Conference, University of Oxford

2022 **Spatial dynamics of SARS-CoV-2 across a heterogeneous mobility landscape in Chile**
Poster, Virus Genomics and Evolution (VGE), Cambridge

2022 **Using multiple sampling strategies to estimate SARS-CoV-2 epidemiological parameters from genomic sequencing data**
Contributed talk, Ecology and Evolution of Infectious Diseases (EEID), Emory University, Atlanta, USA

Teaching

Jan 2025 – Jan 2026 **Non-Stipendiary Lecturer in Biology**
St Catherine's College, Oxford
Undergraduate tutorials in infectious disease epidemiology and evolution. I designed the teaching materials, set essays and marked assessments.

Jan 2025 – 2026 **Undergraduate tutor**
Jesus College, Oxford
Small-group tutorials in epidemiology and molecular biology.

Jan 2025 – 2026 **Module co-lead**
Department of Biology, University of Oxford
Co-developed the computational epidemiology practicals, written in R, for second-year MBiol students.

2022 **Genomic epidemiology workshops**
OUCRU, Ho Chi Minh City; Universidad Autónoma de Yucatán, Mérida
Invited lectures on virus evolution and genomic dataset construction, statistical inference that accounts for phylogenetic structure, and Bayesian phylogenetics with BEAST.

Jan 2022 – 2026 **Demonstrator**
Department of Biology (formerly Zoology), University of Oxford
Undergraduate practicals in phylogenetics, epidemiology and evolutionary biology, including help with coding in R.

Patient and public involvement

2026 – present

Co-design lead, Q-CDSS

NIHR Invention for Innovation (i4i) FAST; UCL AI4coma lab

Leading stakeholder co-design for a hybrid classical–quantum decision-support tool to predict critical events such as cardiac arrest in intensive care patients. Funded by NIHR i4i FAST in 2026, with Applied Quantum Computing and Guy's and St Thomas' NHS Foundation Trust.

Aug 2024 – present

Consultant in patient and public involvement and engagement (PPIE)

Evelina London Children's Hospital; King's College London

Evaluating patient and public involvement in the Neurology department through surveys of clinical staff, and recommending how to build patient perspectives into research strategy and reporting.

2021 – present

Public contributor

NIHR Health Protection Research Unit in Emerging and Zoonotic Infections

Helping the unit improve how it involves patients and the public in its research.

2020 – 2023

Young adult representative

James Lind Alliance; Childhood Neurological Conditions Priority Setting Partnership

On the steering group of the partnership that identified the UK's top ten research priorities for childhood neurological conditions, and in the team that analysed the survey data. Published in Developmental Medicine & Child Neurology in 2024.

2018 – present

Support, information and research volunteer

Encephalitis International

Peer support, public engagement and patient-facing resources, including the charity's information page on CLIPPERS.

Leadership and service

2026 – present

MCR Sports Representative

Jesus College, Oxford

2025

MCR President

Jesus College, Oxford

Served three terms leading the college's graduate common room, and co-chaired the Conference of Common Rooms. Before that I was the MCR's Social Secretary (2023–2025).
